## **PERFORMANCES, EXHIBITS, PRODUCTIONS (Visual/Performing Arts):**

2010, Co-lead role (Craig Bond being the other significant contributor) in "Reputation Leaders and Quality laggards". The idea stems from an early theoretical model of quality investment with private and collective reputations which did not work out so well. Craig did the analytical part to simulate the scenarios. We end up with an interesting story on the welfare implications of having a firm dominating the reputation of a given region

2010, Co-lead role (with Stephan Kroll being the other lead contributor) in "Do taste bud trump labels and information". Built theoretical framework for the data analysis and estimated Heckman's and another two-part model using data from the experiment. Took some work, but we have some interesting results here. In essence, sensory information can increase/decrease WTP for normal apples, but only increase/no effect for organic and local. Will submit this as soon as ONE CO-AUTHOR does is job.

2010, Junior role in "The interaction of price and non price policies...". Chris Goemans did all the data collection estimation and a first rough draft. I did make a quite significant reshaping of the manuscript, the equations and overall presentation.

2010, Lead role in "An in Store Valuation of Local and Organic Apples". Designed the store experiment, did analysis and wrote first draft.

2010, Research Narrative:

Decent year for publishing: one AJAE as lead author, and a co-authored book chapter on hedonic modeling in the Oxford Food Policy Handbook is forthcoming.

The AJAE article uses data from my dissertation, but it's all work done here at CSU. Did the data analysis and most of the writing. Probably my best article so far, if you ever want to read one.

The book chapter took a lot of time (37 pages of manuscript with small contributions from Jill), but i have a pretty good understanding of the literature now. Overall a good contribution and hopefully it will be cited.
