

Department of Animal Sciences General Seminar Schedule – Fall 2013
Seminar Held in Classroom at the RIC Building on Foothills Campus
Each Tuesday, Beginning 27 August 2013 @ 12 noon to 12:50 pm

Current as of: Monday, October 14, 2013

Semester topics and objectives:

1. Provide students with training and experience in giving scientific presentations
2. Have faculty present their research, teaching and outreach programs so that the entire department is more familiar with what others do.

These topics and objectives will be blended throughout this semester and Spring 2014 semester. Our goal will be to have each student and each faculty present in the next 2 semesters. There will be 2 student presentations of 15 minutes each on designated days. Faculty will have the entire seminar time for presentation of their program. There will also be a few outside speakers during each semester.
