

Instructions for Accessing the Non-Registered Applicator Training Modules at CSU

(Please see note below about browsers and using tablets and iPads at this time.)

Step 1. Register for the Non-Credit Course through CSU Online at:

<http://www.online.colostate.edu/courses/AGLL/AGLL4001.dot>

Step 2. Select "Add to my Courses" (menu on right side of bar).

Step 3. Begin "Registration for Non-Credit Courses"

Step 4. Register as a new customer by "Create New Account". If you ever want to take another Non-credit Course at CSU Online, you will use the information generated during this registration to login. However, this will NOT be your login information for the course as your login information will be provided in a second email.

Step 5. Complete Registration details and "Submit Registration".

Step 6. You will receive two emails. The first email is from CSU Online Plus and is a confirmation of your registration in the course. **The second email (from csu_online_questions@mail.colostate.edu) contains the Login ID and password information to access your course.** (Be patient...the second email takes a little time to show up!) **RETAIN this information as you can exit the course and return at your convenience.**

Step 7. Access the login to the course at <http://info.canvas.colostate.edu/login.aspx>

Login using the green "Non-Credit Course" button by inputting the Login ID and password from the second email. (You can bookmark this page in your browser to easily return to it.)

Step 8. Agree to the "Updated Terms of Use". This will return you to the "Non-Credit Course Login". (This step will not have to be repeated.)

Step 9. Access the course by using the drop-down menu under "Courses" in the top menu bar.

Step 10. Begin the course by clicking "Start Here". Once you have read that, you can progress through the Modules sequentially. After you complete all 5 modules and quizzes, you will be allowed to print your certificate.

******* The learning system software, CANVAS, does NOT work properly with Internet Explorer. Use Chrome, Safari or Firefox. At this time, the course CANNOT be viewed on tablets or iPads. We are working towards that goal and will update the information here when it is available.***
