

Dr. Jim Ippolito has been working with Rock Canyon High School (Highlands Ranch, CO) students on a project entitled “Analyzing goat browsing as a form of wildfire mitigation”. Dr. Ippolito has been providing sampling, analysis, and statistical details for the students and their project. The students were very successful at a recent science fair, winning six different awards including first place in the Earth and Environmental Senior Division, second place for the Colorado Chapter of the Soil and Water Conservation Society, received the Denver Mensa Award, ASU Walton Sustainability Solutions Award, and the Geoscience Excellence from the Association for Women Geoscientists. The team will be competing at the state science fair held at CSU in April 2018.
