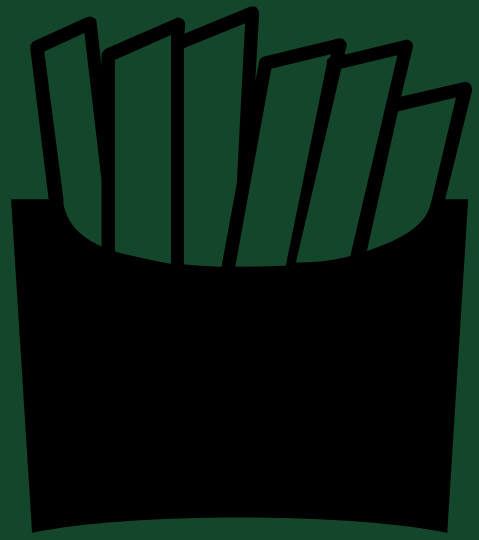
Limitations & Vulnerabilities



COLLEGE OF AGRICULTURAL SCIENCES
COLORADO STATE UNIVERSITY

- Yields Have been Great!
- This year we harvested over 25,000cwt of potatoes.
- Fertility, well monitored, but amendments are very dependent on the donations of 1 enterprise.

- Market prices on potatoes have fallen sharply in last 10 years.

- Malt Barley $14.50 to 9.00
  - Usted bebe mas Cereveza!!

- Available capital drives all of the decisions, but running a Research Station come with expenses unkown to local Growers.
