

## **Stephen R. Koontz - Options Material**

<https://webdoc.agsci.colostate.edu/koontz>

Materials for the meeting in Monte Vista, CO. The meeting was in February 2019 but the prices and examples are from June 2018. This material will be updated during the summer of 2019. My opinion is that feeder cattle options should not be considered until the underlying contract used is four to six months from expiration. So, summer is when producers should start considering actions to protect the value of fall calf marketings.

### **Script**

[Futures & Options Script.pdf](#) - Read this and use the spreadsheets to work the examples discussed. It will be updated during the summer of 2019 when someone contacts me or when the charts communicate that selling is recommended.

### **Basis Resource Materials**

[Basis Information - Fed & Feeder Cattle & Corn - 2018 Complete Year.pdf](#) - Basis Resource History.

[Cattle Basis Figures & Graphs.xlsx](#) - This is the Basis Resource graphed for Colorado.

### **Futures and Options Data**
