Average	10.8	16

^aLSD (P<0.30) 1.6

^aIf the difference between two variety yields equals or exceeds the LSD value, there is a 70% chance the difference is statistically significant.

[†]Test weights could not be measured in a large number of plots due to insufficient grain.

Harvest date: July 9, 2013
 Planting date: September 24, 2012
 Cooperator: Randy Wilks
