^aVarieties with positive values headed later than the trial average and varieties with negative values headed earlier than the trial average.

†This trial could not be interpreted due to plot variation caused by very dry growing conditions. Average yields reported above are only trends and averages should not be considered different from each other. Yield results should not be used by farmers for selecting superior varieties for planting.

Site Information

Collaborator: Beedy Farms
 Harvest date: July 18, 2020
 Planting date: September 25, 2019
 Soil Type: Weld silt loam
 GPS Coordinates: 39.35774, -103.51027
 Trial Comments: Dusted-in trial into tilled residue. Very little fall emergence. Stands were thin and plants had some tillering in the spring. Trial was dry throughout the early spring, although sub-soil moisture was present. Dry conditions prevailed into the late spring and summer.
