<sup>b</sup> LSD (P<0.30)			2.5	1.5		

<sup>a</sup>Varieties with positive values headed later than the trial average and varieties with negative values headed earlier than the trial average.

<sup>b</sup>If the difference between two variety yield or test weight values equals or exceeds the LSD values, there is a 70% chance the difference is significant. Variety yield and test weight in bold are in the top LSD group.

**Site Information**

Collaborator: Andrews Brothers Farms  
Harvest date: July 3, 2020  
Planting date: September 18, 2019  
Soil Type: Haxtun sandy loam  
GPS Coordinates: 40.18664, -102.65426

Trial Comments: Planted (dusted-in) about 2" deep. Planted into wheat stubble (fallow prior year). Stands were excellent overall and plants had lush growth and tillering in spring. Trial had good moisture throughout the spring. A mid-April hard freeze caused minor damage mostly to leaves.
