LCS Atomic AX	Limagrain	HRW	5.5	57
Average			15.0	56

[†]This trial could not be interpreted due to plot variation caused by late-season hail damage and subsequent grain shattering. Average yields reported above are only trends and averages should not be considered different from each other. Yield results should not be used by farmers for selecting superior varieties for planting.

Site Information

Collaborator: Gold Track Farms
 Harvest date: July 17, 2023
 Planting date: September 5, 2022
 Soil Type: Bacid silt loam
 GPS Coordinates: 38.632886, -103.265932
 Trial Comments: Planted 2" deep into excellent moisture and corn residue. Fall emergence was very good and with excellent fall growth. Trial received moderate to severe damage from a hail event in early July. Radar estimates showed the trial received 12.3" of precipitation and 3,671 growing degree-days (GDD) (base 32°F) from January 1st through July 16th.
