## **Tenure and Promotion Evidence of Teaching Effectiveness (Tenure and Promotion Input)**

### **Development of New Courses**

In the fall of 2015 I began working with Dr. Whitney Cranshaw to create 3 online horticultural entomology courses (BSPM356A, B, C). Dr. Cranshaw is providing the lecture material while my focus has been on building the online environment. To that end, I have been working closely with the TILT course design team to create CANVAS shells. I created much of the canvas framework and also the online quizzes (framework and content). I was also responsible for populating each course with a wide range of additional content (self quizzes, exams, videos, and other media) to allow for deeper critical thinking and active learning within the course. I will be coordinating the functionality of the CANVAS online system into the foreseeable future.
