

# Colorado State University's Organic Agriculture Minor

Department of Soil and Crop Sciences &  
Department of Horticulture and Landscape Architecture

*We offer an interdisciplinary minor in organic agriculture, open to all majors across campus. This opportunity includes hands-on and experiential learning to complement the classroom experience.*

*In addition, the program provides students the opportunity for international travel, undergraduate teaching assistantships, and on-campus internships (e.g. composting, organic farm design, applied vegetable crop production, etc.).*
